HYDRO™ SAFE

Hydration System Cleaning Sachets

The fastest, easiest way to ensure your hydration system is clean, safe and free of foul-tasting supplement residues

Control Chemicals Pty Ltd has delivered innovative water treatment products since 1971. We specialise in unique disinfection solutions for primary health care, community-based water treatment and military applications and our client base includes, major international NGOs, governments, supermarket groups and the US Department of Defense.

Hydrosafe™ contains a fast-acting blend of chlorine-based oxidiser and approved, food grade buffering agents. A single Hydrosafe™ sachet placed in a hydration pack bladder after use will:

- Neutralise bacteria & viruses
- Rapidly oxidise any remaining sugar and protein-based energy supplement residues
- Freshen up the bladder by removing foreign tastes and smells
